WHO IS TO BLAME?

Is it Not a Case of Guilty Neglect? A Terrible Responsibility

A Serious Question to a Great Many, and a Sad One,

Rests with Somebody.

Who is to blame?
Surely someone is to blame for the enormous amount of sickness and suffer-ling in the world. Too often people are prone to throw the responsibility for their condition upon some higher power. In nine cases out of ten this is wrong, for in most cases the blame lies entirely with

in most cases the blame lies entirely with the sufferer.

It has been shown by constantly demonstrated fact, proven by the experience of thousands upon thousands of people, that most of the difficulties and diseases from which people suffer are easily and readily cured by the use of Dr. Greene's Nervura blood and nerve remedy, which is, without doubt, the greatest medical discovery of modern times. It is sure to cure disease.

I cannot say enough in praise of this wonderful medicine, it has done so much for me and my family. I heartily advise everybody to take it."

If our renders will take example from this case—and such cases are constantly being reported in the newspapers—much of the sickness and suffering which renders life a burden will be removed. It is a fact that Dr. Greene's Nervura blood and nerve remedy does cure.

It is not a patent medicine, but the prescription of the most successful specialist in curing nervous and chronic diseases, Dr. Greene, of 101 Fifth Avenue, New York City. He has the largest practice in the world, and this grand medical discovery is the result of his vast experience. The great reputation of Dr. Greene is a guarantee that his medicine will cure, and the fact that he can be consulted by any one at any time, free of charge, personally or by letter, gives absolute assurance of the beneficial action of this wonderful medicine.
